ISRAEL GILBERNON

People Analytics | Talent Operations | Data-Driven Talent Acquisition | HR Tech

Salvador, Bahia, Brazil | israelgilbernonpsi@gmail.com | linkedin.com/in/gilbernon | israelg77.github.io/Portfolio

PROFESSIONAL SUMMARY

Psychology graduate working in People Analytics, Talent Operations, and Talent Acquisition. My work is to help ground HR decisions: investigating problems, questioning assumptions, analyzing evidence, and making decision criteria explicit, so that decisions do not rely on intuition alone. Experience in high-volume and technical recruitment, performance management, workforce planning, People process governance, and automation, across initiatives involving Brazil, the United States, and Colombia, as well as working directly with Chinese executive leadership.

PROFESSIONAL EXPERIENCE

CI&T, Campinas, Brazil (Remote) | May 2024 – August 2026

Talent Solutions Specialist | Talent Operations & People Analytics

- **AI & Performance:** Developed a performance calibration POC and structured region-specific business rules for the global Performance Management system covering 8,000+ employees. Created the AI agent framework supporting the process, including agents for insight generation and evidence validation, and structured the solution's documentation.
- **People Analytics & High-Volume Recruitment:** Managed the end-to-end selection process for the Next Gen internship program, with 17,500+ applications. Built an automated database for the analysis, reducing analysis time by 90% and guiding management decisions in real time.
- **People Processes:** Took part in analyzing and redesigning New Hire Admissions, Benefits, Payroll, and Wellness processes, identifying root causes of delays and improvement opportunities in the employee entry journey.
- **Workforce Planning:** Developed analyses to anticipate hiring timeline risks and support capacity planning for the Talent Acquisition team, tracked through global hiring dashboards.
- **Governance & Compliance:** Led the governance of global People processes, including hiring audits, internal mobility, and contract compliance reviews. Structuring these workflows reduced compliance review time by 70%.
- **Automation:** Built Python and Google Apps Script automations integrated with recruiting (Lever) and process management systems, reducing manual data processing time by up to 88% and improving data reliability.

Sinoma Wind Power Blade (Brasil) LTDA, Camaçari, Brazil | October 2023 – March 2024

Bilingual HR Analyst | Talent Acquisition | People Analytics

- **Recruitment:** Managed end-to-end bilingual (PT/EN) recruitment during the plant's accelerated industrial ramp-up in Brazil. Led sourcing for critical Engineering positions (Chemical, Mechanical, Civil, and Electrical) and Quality, Maintenance, and Operations specialists, reporting directly to Chinese executive leadership.
- **BI & People Analytics:** Built Power BI dashboards and defined People Analytics KPIs and OKRs, conducting organizational analyses that supported decision-making by senior leadership and management, particularly during the ISO 9001 implementation phase.
- **Quality & Lean Optimization:** Applied Lean Manufacturing principles to optimize HR workflows, including process mapping and audits. Additionally, structured the unit's Job Architecture & Compensation framework based on multicultural competency matrices.

Clinical Psychologist (Self-employed) | January 2023 – December 2023

SENAI CIMATEC, Salvador, Brazil | April 2021 – December 2022

Organizational Development (HR) Intern | Tech Recruiter & Sourcer

- **Specialized Recruitment:** Managed end-to-end selection processes for technology professionals, covering Full Stack development, software architecture and engineering, data science and engineering, QA, DevOps, product, BI, UX/UI, Scrum, and systems administration, across multiple seniority levels, supporting hiring managers in decision-making.
- **Metrics & Analytics:** Developed recruitment metrics and dashboards using Power BI, Python, and Excel, turning data into analyses that supported decisions by technology and data leaders and managers.
- **Leadership Development:** Designed and delivered training programs for technical leaders on talent attraction, selection, and assessment, contributing to greater consistency in selection processes and decision-making.
